What Is a Black Hole?

This article is part of the NASA knows!

A black hole is a place in space where gravity pulls so much that even light can not get out. The gravity is so strong because matter has been squeezed into a tiny space. This can happen when a star is dying.

What Is a Black Hole?

This article is part of the NASA knows!

A **black hole** is a place in space where gravity pulls so much that even light can not get out. The gravity is so strong because matter has been squeezed into a tiny space. This can happen when a star is dying.
